

Grill Brush Training Guide

Purpose

Grill brushes are used on char-broilers to remove carbon created by food particles sticking to the grill. It is that carbon build-up that spoils the taste of food!

When to Use

Use a grill brush after each time food is cooked on the grill. A wash down of the grill might be needed on a weekly to monthly basis to remove any heavy build-up.

How to Use

Using both hands on the handle, place the brush flat on the grill and push back and forth.

Brush Care and Cleaning

Never rinse or submerge your brush in water. Water warps the wooden block and warping loosens the bristles.

For longevity, keep your brush away from heat and water when not in use. Never leave your brush resting on a hot grill.

To clean, simply shake the particles of food off by hitting the brush block on a hard surface. You may also rub a damp cloth over the bristles and shake the particles off.

Replacement Recommendation

It is time to replace a brush if the bristles flatten, loosen, do not clean properly, or the block becomes curved.

Frequent replacement of your grill brush will provide optimum performance, thereby assuring that your grill is always clean and safe to use.

Grilling Safety Tips

1. Always use the correct brush for the job. A wire scratch brush used for removing paint or rust is NOT a grill cleaning brush.
2. Carefully inspect your grill cleaning brush for loose or damaged bristles. If you find any bristles that are loose, severely bent or broken, replace your grill brush.
3. Visually inspect your grill each time before you place food on the grates to be certain there are no bristles or other foreign matter stuck to the grill.
4. When cleaning your grill, make certain that no residue is left on the grill before you begin cooking.
5. Never rinse or submerge your brush in water.
6. Never leave your brush resting on a hot grill.
7. To clean, simply shake the particles of food off by hitting the brush block on a hard surface. You may also rub a damp cloth over the bristles and shake the particles off.

Maintain the intended taste of your food with our most aggressive line of Flat Wire grill brushes. Having a clean grill that is free of grease or leftover food particles always results in improved taste. A clean grill also cuts down on excess smoke. Chisel-like flat wire steel and heavy-duty stainless steel metal scrapers allow for quick and easy removal of heavy carbon deposits, rust, and burned-on food build-up. Made in the USA.

GRILL BRUSHES - BRASS & CARBON STEEL

Foodservice

This line of grill and oven brushes features high temperature-resistant brass or carbon steel filaments. Brass bristles are soft enough to not damage grill grates, yet are abrasive enough to address baked-on residue found in cracks and crevices. Perfect for use on porcelain, cast iron cooking grates as well as stone ovens. Carbon steel round wire is ultra flexible and an excellent cost-effective choice. Made in the USA.

Oven Queen Grill Brush - Brass

This 7-1/4" brass bristle grill brush is safe for use on pizza ovens, porcelain grates and stone ovens. The long 27" handle allows for added reach to make cleaning the entire grill quick, easy and safe. A heavy-duty scraper blade is attached horizontally to the front end of the cleaning head (scraper not recommended for use on porcelain grates).

PIZZA OVEN BRUSHES

Foodservice

This line of pizza oven brushes is used to clean the pizza stones and any flat metal surfaces inside of the oven. Over time, spilled cheese and sauces can collect in the ovens and affect the taste of the food. Made with durable, yet gentle brass bristles, these pizza oven brushes can take on the toughest of jobs with ease. Brass is the most flexible and softest of the metals offered and will not scratch stone ovens. Made in the USA.

Pizza Oven Brush

This durable and lightweight 9-1/4" pizza oven brush is filled with sturdy but gentle crimped brass bristles. This brush is used to "scrub" the oven of carbon deposits, rust, and the build-up of food that is baked on. A full-length scraper blade for the tough-to-tackle residue and grime is included. A 42" long, thick wooden handle is attached to the brush block.
