

HEALTHY FOR LIFE

# UV ANGEL CLEAN AIR™

24/7/365 UVC LIGHT PURIFICATION

Our engineered air system uses patented UV-C light air purification technology to reduce levels of viruses, bacteria and fungi by automatically and continuously treating the air to create healthier environments.

**Simple** - UV Angel Clean Air™ operates without interruption 24/7/365 and does not interfere with current staff workflow

**Seamless** - Designed with today's critical architectural and clinical considerations at the forefront, the system integrates a sealed UV-C air treatment chamber into existing or new construction in-ceiling lighting

**Effective** - Using the latest in advanced UV-C light purification technology, lab studies have shown effective removal of bacteria, fungus and viruses from the air

Research has shown that reducing contamination in the air also **REDUCES BACTERIA AND FUNGUS ON SURFACES.**

Hospital air samples, on average, are **UP TO 8 TIMES MORE CONTAMINATED THAN SURFACES.<sup>1</sup>**

## HOW UV ANGEL CLEAN AIR™ WORKS

UV Angel uses years of advanced research and development in ultraviolet light and IOT enabled technologies to create a truly modern and effective air treatment system:

- Using patented UV-C treatment technology, air is quietly drawn into a sealed UV-C air chamber with a series of fans and filters
- Air is circulated through the UV-C air chamber where it is treated with an enclosed high intensity UV-C light to inactivate bacteria, fungus and viruses in the air
- Treated air is then returned to the room creating a healthier environment
- UV Angel Clean Air™ is unobtrusive, works continuously, and with the in-ceiling design, maintains the valuable floor space in patient and staff areas

# PROVEN EFFECTIVE

# UV ANGEL CLEAN AIR™

24/7/365 UVC LIGHT PURIFICATION

UV Angel has conducted two separate third party laboratory tests against surrogate pathogens including Escherichia coli (gram-negative), Staphylococcus aureus (gram positive), Cladosporium cladosporioides (fungus spore formed) and MS2 Bacteriophage (MS2) (virus surrogate).

These tests conclusively support UV Angel Clean Air claims to treat bacteria, fungus and viruses in the air. The studies have proven the product's effectiveness at treating:

- **Gram-negative pathogens** which can cause pneumonias, bloodstream infections, wound and surgical site infections
- **Gram-positive pathogens** such as staphylococcus, streptococcus, enterococci and listeria
- **Fungal pathogen surrogates**, which could include pathogens such as aspergillus, yeasts and histoplasmosis
